

The TurfBreeze 30" Fan

The TurfBreeze 36" Fan

The **TurfBreeze 30" and 36" fans** (TB-30-2 and TB-36-3) are direct drive fans complete with OSHA approved finger guards, tilt system, heavy duty oscillator, ground pole and fan pole with height custom designed for each green. Fan motors are available in all voltages, single and three phase power.

Attractive, durable fan covers are available at a small additional cost.

After putting the fan on the green, we cut down our water usage, we cut down our fungicide usage, and we cut down our stress level. Ultimately it was just a win-win and our members noticed.
