

The TurfBreeze 50" Direct Drive

The TurfBreeze 50" Direct Drive fan is the only 50" direct drive turf fan on the market today. The TB-50 DD comes complete with OSHA approved finger guards, tilt system, ground pole and poles with heights custom designed for each green. Fan motors are 5 HP and available in all voltages (except 115) single and three-phase power.

Attractive, durable fan covers are available upon request for a small additional cost.

"It probably gets to 110-120 degrees on some of these greens in the summer. Even though its warm season grass, that's a little extreme! These fans have basically been a lifesaver to my greens!"

Jim Torba, The Wilderness Club, Naples, FL
