

The TurfBreeze Premium

For situations in which power and sound create special requirements, TurfBreeze offers a Premium model producing maximum cooling with minimal power use and motor noise. The TurfBreeze Premium 5 HP Fan has the efficiency of a 7.5 HP, the quietness of a 3 HP, with durable steel construction and is UL rated. The TurfBreeze Premium offers courses a “green” option by consuming less power, yet providing the same great results you’ve come to expect from a TurfBreeze Fan.

The TurfBreeze Premium Fan

The Patriot Club
Owasso, OK

Attractive, durable fan covers are available upon request for a small additional cost.

“I chose the TurfBreeze Premium Fan based on its efficiency and its lower noise level compared to the bigger 7.5 HP motor. There is no doubt these fans helped us get through the most brutal summer I’ve ever experienced.”
